

1.1.3. Days between Two Dates

10:26

Write a Python program to calculate number of days between two dates.

Input Format:

- The first line contains the first date in the format .YYYY-MM-DD
- The second line contains the second date in the format .YYYY-MM-DD

Output Format:

- An integer representing the number of days between the given dates.

Note:

- The first date should always be considered earlier than the second date.

Code:

```
from datetime import datetime
```

```
date1_str = input()
```

```
date2_str = input()
```

```
date1 = datetime.strptime(date1_str, '%Y-%m-%d')
```

```
date2 = datetime.strptime(date2_str, '%Y-%m-%d')
```

```
x= date2 - date1
```

```
days_diff = x.days
```

```
print(days_diff)
```
