

1.2.2. Fibonacci Series

13:56

Write a Python program that uses recursion to print the first `n` terms of the Fibonacci series.

Input Format:

- A single integer `n` representing the number of terms to generate.

Output Format:

- A single line containing the first `n` terms of the Fibonacci sequence, separated by spaces.

Code:

```
def fibonacci(n):
```

```
    if n==1:
```

```
        return 0
```

```
    elif n==2:
```

```
        return 1
```

```
    else:
```

```
        return fibonacci(n-1) + fibonacci(n-2)
```

```
n = int(input())
```

```
for i in range(1, n + 1):
```

```
    print(fibonacci(i), end=" ")
```
